Claim 8 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The term "bacterial" is not disclosed or suggested by the specification as originally filed.

Claims 6, 7, 11 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 6, 7, 11 and 12 are directed to the method for producing a pharmaceutical preparation. However, said claims are indefinite in that the steps of the claimed method have not been set forth.

Claims 1-2 and 6-8 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Baeyens et al (J. of Controlled Release, 1998, vol. 52, pages 215-220), Renard et al (J. Fr. Ophthalmol., 1996, vol. 19, no. 11, pages 689-695) or Golub et al (U.S. Patent No. 5,459,135) for the reasons set forth in the Office Action of April 14, 2005.

Applicant's arguments filed October 14, 2005 have been fully considered but they are not persuasive.

Applicant contends that the cited prior art does not teach claimed salt comprising a cationic component and an anionic component. This argument has not been found persuasive. Claims 1-2 are directed to pharmaceutical preparations which include

Art Unit: 1623

solutions. A person having ordinary skill in the art at the time the instant invention was made would have expected a salt of an antibiotic with an antiphlogistic in a solution to be nothing more than a combination of an antibiotic with an antiphlogistic as disclosed by the cited art. With respect to claims 6-7, the same encompass combining an antibiotic and an antiphlogistic in a solution as encompassed by the cited prior art.

With respect to claim 8, which is directed to a method of treatment, note that upon administration a salt of antibiotic and an antiphlogistic is expected to be nothing more than a combination of an antibiotic and an antiphlogistic.

Claims 3-5 and 9-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1623

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
